

The Mine Safety Act – Cities and Counties

Employees involved in a mining operation, including employees working at gravel pits, are required to comply with MSHA's training requirements. This is a perfect opportunity for your employees to receive the annual refresher training required by MSHA.

For those not required to comply with MSHA, please review the training sessions offered this year and consider sending your employees. A minimal investment of time could help avoid work-related injuries.

2019 Training Topics:

The Mine Safety Act
Pit Safety
Preventing Slips and Falls
Back Safety
Accident Prevention
Defensive Driving
Confined Space Safety
Fire Safety
Excavation Safety
Hazard Communication
Drug and Alcohol Awareness
Personal Protective Equipment (PPE)
First Aid
Transporting Equipment

Safety Benefits, Inc.
4901 Isabel Place, Suite 120
Sioux Falls, SD 57108

Present

Annual Safety Training Classes for Highway, Street and Public Works Departments

- *These classes meet the MSHA Annual Refresher Training Requirements*
- *These classes qualify for 5 contact hours toward Water/Wastewater Operator Recertification*

Coordinated by: Safety Benefits, Inc.

Doug Kirkus, Jeff Lanning, and Matt Petersen are very familiar with South Dakota public entity liability and work comp exposures. These classes are designed to help make the work place as safe as possible for your employees and reduce your exposures to civil liability. These classes meet the training requirements necessary to comply with Part 46 of the Mine Safety Act and qualify for recertification hours for Water and Wastewater Operators.

Annual Refresher Training is required. Each employee involved in mining must receive 8 hours of annual refresher training as outlined in your written training plan.
